Plug-In Hose Fittings

■ Assembly

1. Cut the hose at a right angle and straight with a sharp knife to the desired length.
2. Push the hose into the nipple as far as it will go against the plastic ring.

If it is difficult to fit between the hose and nipple, lubricant can be used to make it easier to slide on.

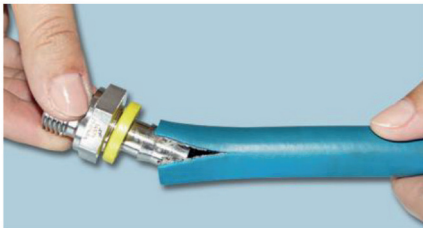

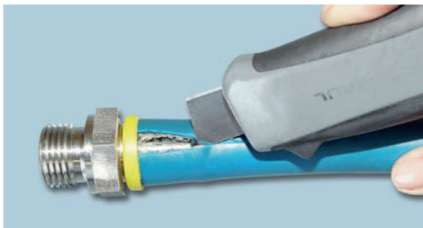

Plug-In Hose Fittings

■ Disassembly

1. Cut open the hose with a knife at an angle to the nipple.

Attention! The nipple must not be damaged during the cutting process, otherwise leakage will be caused.

2. Pull the nipple out of the hose.
